

FOR A SOCIALIST SOCIETY
WHICH BENEFITS ALL
Our capitalist state
systematically extracts value
from those who have nothing -
to feed into the ravenous
maws of insolent capitalists
who create nothing of value.
We must move beyond our
fundamentally anti-democratic
economy. Not only is this
system funneling wealth to
people who don't need it, it
is prone to collapse. Chasing
every cent of profit, owning
class individuals will
over-produce goods and
under-pay workers in boom
times, leading to recessions.
These crises are frequent, at
a rate of one per 8 years
since 2000. Each recession is
an opportunity to siphon more
money from the bottom to the
top. This is how a few firms
made housing an impossibility
to today's generations. We
must eradicate economic
pilfering and build a society
of free associations of men,
where work is done not to
enrich the few but to enrich
us all. We must join together
and do away with capitalism
once and for all!

TUCSON RED ACTION GROUP

ABOLISH THE SLAVEHOLDER'S

CONSTITUTION We reject a constitution created by slavers, intended to enshrine inequality and anti-democracy. This Fascist administration in power is simply a linear continuation of tendencies inherent to this country's founding. Back in ye olde colonial America, George Washington mounted his slaves' teeth in his own mouth and James Madison owned a plantation. It is suspected that about half the founding fathers owned slaves. Our founders were wealthy landowners and slaveholders. When America seceded from the British, it was these classes of slave-driving elites who created a system which benefited them.

They wrote a constitution which gave lip-service to the masses who were necessary to recruit for their cause, while ensuring it would secure their class interests in practice. Our founding fathers created a Bill of Rights which enshrined freedom of speech and assembly, only to violate them with the Alien & Sedition acts a few years later. They said all men are created equal, then proclaimed slaves were 3/5 of a human to appease human-owning ghouls(their constituents). They (not in any actual constitutional document) proclaimed each human has a right to life, liberty and the pursuit of happiness, while profiting off of an economic system which condemns the working masses to wage-slavery until death.

SMASH THE FACIST STATE

We maintain that all state structures are the manifestation of class domination, a means by which the dominant class secures the necessary conditions for its existence. The vast expansion of state oppression we are seeing today is indicative of a capitalist class in crisis, which grasps violently onto security in the form of fascism. The only way to liberate ourselves from state oppression is by disintegrating the state entirely. Our task at hand is to completely smash the state, and replace it with autonomous worker's governance bodies and Communes.
